Usman Asghar

Software Engineer (4+ Years)

+923448711008 usmanasghar00000@gmail.com linkedin/in/usman965 https://github.com/usman965

Professional Summary

Results-driven React.js and React Native Developer with extensive experience building and deploying scalable mobile and web applications across healthcare, sports, fintech, and education domains. Proficient in React Native, React.js, Angular, Firebase, GetStream Chat, AWS, Stripe (all payment methods including Connected Accounts), In-App Purchases, Zoom SDK, Blockchain integration, Web3 / dApp development, and crypto wallets.

Actively leverage modern **AI-powered development tools** such as Cursor, ChatGPT, Bard, and other cutting-edge AI assistants to accelerate development cycles, improve code quality, streamline debugging, and enhance overall productivity while maintaining high engineering standards.

Core Skills

- React Native
- React.js
- Angular
- JavaScript (ES6+)
- TypeScript
- Android Deployment to Play Console
- iOS Deployment to Appstore Connect
- Stripe (Google Pay, Apple Pay, Card, Bank Transfer)
- In-App Purchases (iOS and Android)
- Web3
- GraphQL (Apollo)
- Code Signing & Certificates
- Social Authentications (Google, Facebook, Apple)
- Push Notifications
- Firebase (All Services)
- Google Maps
- GetStream Chat
- Zoom SDK
- Android (Java, Kotlin)
- AI Tools (Cursor, Bard, ChatGPT)
- Web3.js
- API Integration (REST)
- Git (NPM/ YARN)

Professional Experience

NexTek Solutions | Lahore, Pakistan | 2023 – present

React Native Developer

Key Responsibilities:

- Developed and maintained mobile applications using **React Native**, focusing on high performance, smooth UI/UX, and seamless cross-platform experiences.
- Directly handled client communication requirements, updates, and deliveries, ensuring smooth collaboration and alignment on project goals.
- Conducted **code reviews** to uphold best practices, ensuring high-quality code standards, while mentoring junior developers to improve their technical skills and adaptability.
- Managed production-level workflows, ensuring efficient and timely project execution.
- **Handled client test tasks** to assess team skills and project feasibility before official handover, typically within tight deadlines, ensuring quality deliverables and client satisfaction.

Projects

- **Nouview (Online Tuition Providing Platform)**
  Android Play Store Link iOS App Store Link
  Built a mentorship platform enabling students to connect with mentors worldwide. Integrated Google Maps for mentor discovery, Zoom SDK for virtual sessions, and Firebase for authentication, chat, and real-time updates. Added In App Purchase subscriptions and Stripe-based payment models.
- **SPiN (Sports Networking Platform) – Sports Community Mobile App**
  Android Play Store Link iOS App Store Link
  Designed a comprehensive app for athletes to create profiles, form teams, join leagues, share posts, and chat. Integrated GetStream.io for chat and social feeds, plus Google, Facebook, and Apple login. Implemented event scheduling and push notifications.
- **MedFlow (Healthcare Management App) – Mobile Healthcare Solution**
  Worked on appointment booking, doctor-patient interaction, prescription management, and push notifications. Enhanced performance by Upgraded project from **React Native 0.68 → 0.81**, ensuring compatibility and performance improvements.
- **NES Health (Energy4Life) – Healthcare Application**
  Android Play Store Link iOS App Store Link
  Built a cross-platform bioenergetic health assessment app in React Native. Integrated **BLE (React Native BLE PLX)** for device communication, **voice analysis** with Audio Record + FFmpeg Kit. Added **flavour management handling**, secure API integration (Axios), file operations (RNFS), permissions, animations, and sharing. Also handled dev and production flavors for testing purposes.

- **Video Editor (Testing App)**
  Experimented with video editing capabilities in React Native, focusing on trimming, filters, and transitions.
- **Hair Recommender (Testing App)**

Built a proof-of-concept app recommending hairstyles using AI-based image recognition.

- **Auth Testing (Testing App)**
  Built React Native authentication app with TypeScript, featuring biometric login, secure storage (Keychain/Keystore), and complete auth flows. Implemented form validation, account lockout, and session management.
  Delivered fully tested app with 30+ Jest tests (85%+ coverage). Completed within 4-8 hour timebox per client requirements.
- **MedFlow Patient Portal – Web Platform (Angular)**
  Patient Portal Link
  Build a web-based patient portal using Angular technology.
  The portal will allow MedFlow Laboratory patients to view their test results, download result PDFs, access receipts, and securely pay their bills through an integrated Stripe payment system supporting cards, Google Pay, and Apple Pay.

AMMAG Technologies | Lahore, Pakistan | 2021 – 2023
React.js Developer(Web3 Integration Developer)
Key Responsibilities:

- Developed and maintained mobile and web applications using React Native and React.js, focusing on high performance and smooth UI/UX.
- Gained hands-on experience in integrating third-party libraries and APIs into React Native and React.js applications.
- Explored Blockchain concepts and worked with **Web3.js** for decentralized application (dApp) integrations.

Projects

Scarlet Chins – Web Platform (React.js)
Built a fully decentralized investment platform allowing users to invest in virtual chains and earn automated daily rewards. Designed a responsive and user-friendly frontend in React.js and integrated with blockchain smart contracts for secure, transparent, and automated transactions. Implemented wallet connectivity (MetaMask), daily reward calculations, and decentralized withdrawals.

RedLight Marketplace – Decentralized Web Platform (React.js, Blockchain)
Contributed to an NFT and DeFi marketplace on RedLight Blockchain. Implemented NFT minting via Metamask wallet and integrated reward distribution in cryptocurrency.

Funk Wallet – React Native Mobile Wallet
Built a mobile crypto wallet with wallet creation, transactions, and blockchain integrations.

Education

Bachelor of Computer Science (BSCS)
KFUEIT, RYK, Pakistan
Graduation Year: 2021

Key Achievements

Awarded *Employee of the Month (2x)* and *Employee of the Quarter* for outstanding performance and project delivery.
Recognized with a **YBR Motorbike Prize** for exceptional contributions and dedication.
